

PROJECT WEEKLY PROGRESS REPORT

DATE:

WEEK NO: 1

WORK TITLE:

Finalizing the Group members

WORK DETAILS:

We've come up with a Group of classmates who have a bit of experience in different fields like AI/ML, Web Development, Mobile Development as if we want to create a project around that technological stack.

We had a brainstorming session about what we should build and did some research on a personal basis so next time we can present ideas in front of the team. Also, we've consulted with our project guide and project coordinator and gave the finalized team lineup

PROJECT WEEKLY PROGRESS REPORT

DATE:

WEEK NO: 2

WORK TITLE:

Discussion with group members for presented ideas.

WORK DETAILS:

In this week we've done few sessions as a team and we've came up with few ideas. where a roles and responsibilities, We Clearly assign specific tasks to each team member, ensuring everyone knows what they are responsible for. For example, one person could focus on backend development, another on frontend development, another on app design, and others on Machine learning dashboard development etc.

PROJECT WEEKLY PROGRESS REPORT

DATE:

WEEK NO: 3

WORK TITLE:

Meeting up with the Mentor and finalizing the Topic

WORK DETAILS:

In this week we proposed our ideas about the project with our project mentor and finalized the academic calendar generator as our final year project topic we discussed about how we will implement it what algorithms might use and what stack we are going to be using for development.

But sir didn't like this project idea so he suggested us another project.

PROJECT WEEKLY PROGRESS REPORT

DATE:

WEEK NO: 4

WORK TITLE:

Change in Topic, due to this topic already made by another team.

WORK DETAILS:

Due to the, this topic already made by another team, we have decided to change our topic to “**Farmers market place is change and new topic finalized which name is Farmers disease diagnostic portal.**” This platform’s aim is to enhance the collaboration between different platforms like Animal disease, Plant disease etc. by enabling sharing of data and resources efficiently and effectively. This problem statement is provided by the Ministry of Agriculture. We discuss about this problem statement with our project guide that how can we work on this project what are the challenges in existing system how we can tackle those problem and how can our project can help/work for the farmers of India, what should be our approach when we do this project. What are the different organizations we can research to improve our understanding of this project. So after discussion on all the possible aspect we decided to do this project as our final year project.
