| | Shaikh Saqlin Raza Alauddin | | |
| | | | |
| Completed Deliverables (Current Week Work) | This week, progress was made in integrating the machine learning model | | |
| | into the flutter frontend to enable seamless interaction with the | | |
| | application. The model was converted into a compatible format while | | |
| | ensuring the original H5 file, dataset, and database remained intact. To | | |
| | enhance accessibility, multi-language support was implemented, allowing | | |
| | users to receive responses in their preferred language. | | |
| | | | |
